DEC 9 1957

Mr. Harold R. Nightlinger, Executive Secretary
Construction Contractors Council
Munsey Building
Washington, D. C.

Dear Mr. Nightlinger:

We have received your telegram dated December 13, 1957 regarding the work of grading and drainage on the Langley, Virginia site in preparation for construction of our new headquarters building.

The Public Buildings Service of General Services Administration is our construction agent for this project and we have discussed with their officials the points enumerated in your telegram, as well as your recommendation to combine the grading with the general contract. It is our conclusion that no change in our present procedure is warranted. The Public Buildings Service will, therefore, proceed to receive bids as scheduled for the grading and drainage work mentioned above.

We appreciate your concern for the problems that may arise, but feel that the overall advantages of our present plan justify its continuance.

Sincerely,

Signed

L. K. White
Deputy Director
